

# AI CLOUD INTERCOM ACCESS CONTROL

Cloud Intercom

Android System

High Performance  
CPU

Digital Gate  
Machine

## Product Introduction

AI Cloud door intercom realizes cloud intercom access control for video calls with visitors through mobile phone APP, supports door phone calling mobile phone APP, indoor phone, mobile phone cellular phone and other functions, metal shell design, Android system, high-performance CPU, supports communication networks around the world, and supports many ways to open the door, such as swiping card, password, visitor temporary password and so on. It is suitable for the installation and use of residential areas, apartments, schools, hospitals, parks, offices and other scenes.

## Functional Characteristics

- 1) Integrate the functions of cloud visual intercom, local visual intercom and access control by swiping card password.
- 2) 1.8G high-speed CPU, Android.
- 3) Optional 4G communication with standard Ethernet.
- 4) Multiple unlocking methods: mobile Bluetooth / mobile remote / optional QR code / swiping card / password unlocking / optional telephone transfer unlocking / indoor unit unlocking, etc.
- 5) 200W low illumination camera.
- 6) Remote cloud management to minimize on-site management.
- 7) Support security capture: video information collection of entry and exit personnel, early warning.
- 8) Seiko, equipment waterproof grade IP54.

## Platform Characteristic Function

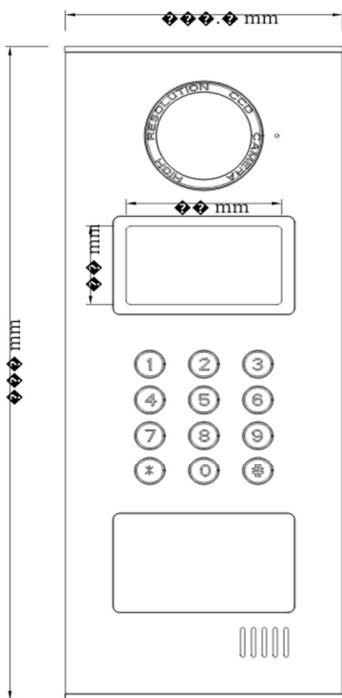

- 1) Unified management of million-level equipment on the Internet of things, fully supporting cloud audio and video solutions
- 2) A unified platform integrating visual intercom, face recognition access control, cloud door control, parking lot, ladder control and monitoring
- 3) Real-time event logging, mass storage support
- 4) Mature API docking service to help the scene land
- 5) Stable and extensible service capability
- 6) A secure and reliable system platform.

## Specification Parameter

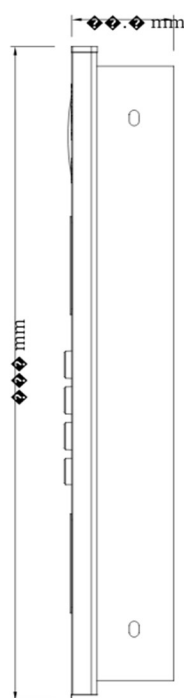

Main chipA53	1.8G main frequency
Memory	2GB
Storage	16GB
Door opening verification mode	Card, Password, Remote, Bluetooth, Video Intercom
Radio frequency card type	IC (ISO14443A/B), ID optional support
Press the key	Metal physics button, 12 key
Networking mode	Ethernet, optional 4G
Card capacity	100000
Bluetooth door opening distance	Barrier-free within 10 meters
Camera	200W
Supplementary lamp	White light supplementary lamp
Cue lamp	Red, green and white cue lights
Access control input and output	All the way out the door switch, one door magnetic input and one door output
Alarm input	1-way alarm input

Weigen interface	1-way Weigen output interface
RS485 interface	1-way RS485 interface, optional configuration for ladder control
Shell material	linkage Metal, tempered glass
Waterproof grade	IP54
Operating temperature	-30°C~80°C
Working humidity	10-90%
Power specification	12V/2A
Equipment size	128.2*47.5*330mm
